Schneider Engineering, PLLC Celebrates 25th Anniversary Now Offering New Services

APRIL 1, 2013– HOLTSVILLE, N.Y. – SCHNEIDER ENGINEERING, PLLC (www.schneiderengineering.com) is celebrating its 25th Anniversary with the same continuing commitment to the community as they did when they first started in 1988.

“We’re proud to be celebrating 25 years in business with our senior engineering team’s combined 127 years of experience, or an average of 31 years for each engineering staff,” says company owner and principal, Steven Schneider, P.E. “We know how important engineering services are to our clients and their goals, and we strive to offer the most thorough and complete engineering services available. We continue to work towards our clients’ goals with the same professionalism, integrity and dedication.”

Schneider Engineering, PLLC has long been recognized as an expert in the Civil Engineering field and has been accepted as an expert by all levels of the community including county, town, village and city agencies, and town and zoning boards throughout Nassau and Suffolk counties. It has also been accepted as an expert witness by federal, state, and county court systems in engineering, accident and criminal cases.

Going forward, Schneider Engineering, PLLC will continue to offer its full capabilities in roadway and traffic signal design, traffic impact studies, construction management and inspection, traffic accident analysis and accident reconstruction. The company continues to impress its clients with its use of the latest technologies, including enhanced aerial imagery, Geographic Information Systems (GIS) — which it uses with many towns and municipalities on Long Island as well as private companies — and database and internet development.

Schneider Engineering, PLLC is also now working with its current clients to address recent updates to the ADA standards concerning accessibility in parking facilities that may directly impact both public and private entities. Under the trained eye of Schneider Engineering, PLLC's senior staff members, any organization affected is being brought into compliance.

Schneider Engineering, PLLC will offer additional areas of expertise (with new added staff) in structural and architectural areas including building improvements, construction, utilities, accessibility, road, drainage, park facilities, site studies, building permits processing, site plan review, site and building contract inspection.

Schneider Engineering, PLLC's has also recently partnered with Oceansafe Group. You may have heard about their products. They make FEMA (and NYS) approved hurricane resistant buildings (residential and commercial) that have been used in New Orleans, Long Island, and many places world-wide. These buildings not only have a 300 year service life, but can be built in less than half the time of normal housing structures with substantially lower labor costs. They can be used for homes, commercial buildings, trailers, re-useable pods, and more.

Schneider Engineering, PLLC's new additions to its already long list of services combined with existing engineering skills will provide the finest professional analyses available.

If you want to contact Schneider Engineering, PLLC, please call Steven Schneider, P.E. at 631-698-6200 extension 100.

Schneider Engineering, PLLC is a civil engineering firm on Long Island.
